In this Wealth Planning Update:

- » *The Basics of Opportunity Zones*
- » *What do the “Proposed” Treasury Regulations Mean?*
- » *Who is an Eligible Taxpayer?*
- » *Leveraging the Qualified Opportunity Fund Investment*

The 2017 Tax Cuts and Jobs Act introduced the Qualified Opportunity Zone program, designed to provide a tax incentive for private, long-term investment in economically distressed communities. In June 2018, approximately 8,700 opportunity zones were identified in locations nationwide providing map boundaries for taxpayers to invest and defer their recently triggered capital gains. Wells Fargo Private Bank released a Wealth Planning Update in August 2018 with educational information on the subject of the new Qualified Opportunity Zones. An abbreviated summary of the basics is included below, but a deeper discussion may be had by reviewing the earlier Wealth Planning Update.

The longer that many advisors reviewed this new tax law, the more questions and uncertainties were discovered regarding Opportunity Zones and how taxpayers may utilize them. Officials from the U.S. Treasury let the public know that regulations for Opportunity Zones were a priority and in October the Treasury released proposed regulations answering many of these unanswered questions, providing investors a relatively clear roadmap to investing in a Qualified Opportunity zone (“QOZ”).ⁱ

Opportunity Zone Basics

In order to achieve deferral of recognition of all or some of the gains from the sale of a capital asset, the taxpayer may make an investment of the capital gain portion of the proceeds, within 180 days of being recognized, into a Qualified Opportunity Fund (“QOF”).ⁱⁱ A QOF is defined an entity which is organized as a

Note that Qualified Opportunity Zone Funds are not available to clients of Wells Fargo and this information is solely for educational purposes.

Wealth Planning Update

corporation or partnership (no disregarded entities) and which subsequently makes investments in QOZ property, which is defined as:ⁱⁱⁱ

1. **QOZ Stock or QOZ Partnership interests:** stock in a corporation or a capital or profits interest in a partnership, both of which must operate or invest in other QOZ businesses located within a QOZ.^{iv}
2. **QOZ Business Property:** Property acquired by purchase after December 31, 2017, with its original use in the QOZ or, if the property is already in the QOZ, then the property is substantially improved upon by the QOF. *Substantially improved* means investing an amount equal to the acquisition cost of the property over a 30 month period^v
3. **90% Rule:** A QOF must hold at least 90% of its assets which qualify as either QOZ Stock, QOZ Partnerships, or QOZ Business property.^{vi}

A related term which gets used often in discussing this subject is a **QOZ Business**. This is simply a trade or business in which substantially all of the tangible property owned or leased by the business is QOZ Business Property, as discussed above.^{vii}

Taxpayers are incentivized to invest capital gains in QOZ property or businesses in the following three ways:

1. **Tax Deferral Through 2026:** A taxpayer may elect to defer tax on any capital gain invested in a QOF within 180 days of realizing the gain.^{viii} The capital gain is not recognized (i.e. subject to tax) until the earlier of the QOF sale/liquidation date or December 31, 2026 (with any tax due with the filing of the 2026 return in 2027).^{ix}
2. **Up to 15% Exclusion of Deferred Gain:** The taxpayer receives a 10% exclusion of the deferred gain after holding the QOF investment for five years and an additional 5% exclusion of the deferred gain after seven years. In other words, when the deferred capital gain is recognized in 2026, the taxpayer may be subject to tax on as little as 85% of the deferred gain depending on when the investment in the QOF was made and how long the investment was held.^x
3. **No Tax on Future Appreciation:** The taxpayer is subject to tax on the deferred capital gain in 2026 (subject to the reduction described above), but any appreciation on the QOF investment held for 10 years or more is not taxable.^{xi}

While the basics seem clear enough, until the proposed regulations were revealed in October, many questions remained. A few of those questions include: “Who is an eligible taxpayer?”; “What is an eligible gain?”; to the more nuanced “What is ‘substantially all’ tangible property of a QOZ Business?”; and “How does the investor retain cash to improve QOZ Property or operate a QOZ Business without violating the 90% requirement?”

The proposed regulations answer a number of these questions, but a few still remain unanswered.

What do the “Proposed” Treasury Regulations Mean?

As the name suggests, these regulations are proposed, not final; the rules may change. The Treasury specifically requests comments and suggestions from the public on certain parts of the law and has allocated a 60-day comment period (expiring mid-December).^{xii}

Though not final, a taxpayer may rely on the proposed regulations so long as the taxpayer “applies the rules in their entirety and in a consistent manner.”^{xiii} This is important because QOZ investments are extremely time-sensitive.^{xiv} By issuing proposed regulations and permitting taxpayers to rely on them, the Treasury is giving us its first interpretation of the QOZ legislation and providing taxpayers with only a potential roadmap they need to take advantage of this program.

What gains are eligible?

A simple question, but the answer was unclear in the original statute. The QOZ statute used both terms “gain” and “capital gain.”^{xv} The proposed regulations clarify that all capital gains, but only capital gains, realized prior to January 1, 2027 are eligible for deferral.^{xvi} This means both short term and long term capital gains are available for deferral. The deferred gains retain the same character over the life of the investment in the QOF (i.e. until the earlier of 2026 or the sale date), so short term capital gains cannot become long term capital gains by deferral in a QOF.^{xvii}

It’s also important to note that the gain cannot arise from a sale or exchange with a related person – meaning typical family members, but would also exclude transactions between a trust and its grantor, a trust and a beneficiary, and related corporations or transactions between an entity and a significant shareholder/owner (applying a 20% ownership test).^{xviii}

Who is an Eligible Taxpayer?

Any taxpayer that recognizes a capital gain is eligible. For instance, individuals, C corporations, partnerships, real estate investment trusts (REITs), S corporations, and trusts and estates are all eligible to participate in QOZ’s.^{xix}

When must the gain be invested in the QOF?

The taxpayer has 180 days from realizing a capital gain to invest in the QOF.^{xx} For most taxpayers, the capital gain is realized on the date the capital asset is sold. However, the proposed regulations clarify that the owner of a pass-through entity does not realize the gain until the end of the entity’s taxable year.^{xxi} This means that if any capital gain is not deferred by the entity within 180 days from the sale event, then an owner of the pass-through entity will have 180 days from the last day of the entity’s taxable year to defer the capital gain. The entity and the individual may elect to defer all or a portion of the gain within the respective time frames. This is a major clarification because an owner of a pass-through business may have as late as 180 days from December 31st regardless of when the entity realized the gain earlier that year.^{xxii}

How long can an investor hold the QOF investment?

The QOZ statute did not require a termination date. Absent guidance, many taxpayers thought they could hold the investment for 30, 40, 50 years or more and all appreciation would avoid tax. The proposed regulations clarify that the tax free appreciation of a QOF investment terminates in 2047.^{xxiii} This still gives an investor

Wealth Planning Update

several decades for the QOF investment with potential to appreciate tax free so long as they meet the 10 year holding period.^{xxiv} The QOZ program is designed to encourage long-term investment, so we feel that this sets a reasonable time frame for an investor to realize the full benefits of the program. What we don't know is how this termination date works. The Treasury is asking for comments on whether: 1) the investment must be sold in 2047, or; 2) the investor should simply receive an income tax basis equal to the fair market value (presumably a "step-up" in basis), but can continue to hold the investment.^{xxv}

Do existing entities qualify for the QOZ program?

It's possible for existing entities to qualify for the QOZ program, but only in unique circumstances.^{xxvi} Taxpayers with a business entity in a QOZ may utilize this business for their QOF or as a QOZ Business so long as the business entity itself satisfies the QOZ requirements. One requirement, however, is that the business property must be *acquired* by the entity *after* December 31, 2017. In other words, existing assets in an existing entity will apparently not qualify for QOZ treatment unless the entity can qualify as a QOF or QOZ business with newly acquired property and application of the 90% rule, discussed below.

Does 90% investment, really mean 90%?

A QOF must hold 90% of its assets in QOZ stock, partnership interests, or business property.^{xxvii} We see that as a high threshold, especially when running a business or developing property. If a QOF were going to renovate or construct real estate within a QOZ, it could take many months, even years, to get permits, finalize plans, obtain zoning changes, etc., and during that time cash held by the QOF to start the project or meet the "substantial improvement" requirements would likely cause the QOF to fail the 90% test. The proposed regulations address these concerns in a few different ways.

1. **Working Capital Written Plan Safe Harbor:**^{xxviii} A QOZ Business meets the 90% test if it holds cash as working capital and meets the following three requirements:
 - a. The QOZ business has a written working capital plan for the acquisition, construction and/or substantial improvement of tangible property within a QOZ over no more than a 31 month period.
 - b. The plan must be reasonable and consistent with the ordinary start-up of a trade or business.
 - c. The working capital assets must actually be used in a manner substantially consistent with the written plan.

It is worth noting that there's currently no requirement to present or otherwise certify the plan on an on-going basis. It appears that the written plan must simply exist and may need to be produced if, for example, requested by the IRS.

2. **The 90% Rule, unless it's 70% Rule:**^{xxix} Do you remember the "substantially all" requirement?^{xxx} This is the requirement that a QOZ business must have substantially all of its tangible property invested in a QOZ. Well, the regulations clarify that *substantially all* means 70%. The result is that a QOF has a 90% QOZ business property investment requirement, but could simply meet this requirement by investing in a QOZ business that only has a 70% QOZ business property investment requirement. The regulations themselves admit this rule opens the door for some gamesmanship, but seem to be ok with it.^{xxxi} Although, guidance is requested on whether 70% is too much, too little, or just right for operating the QOZ.

Wealth Planning Update

3. **The Substantial Improvement Requirement:** Whether the QOF invests in a QOZ business or directly in QOZ business property, the “substantial improvement” requirement comes into play where property is already being used in a QOZ. This property qualifies for the 90% test (or 70% test), so long as it is substantially improved over a 30 month period. It appears that the new working capital test is being coordinated with the substantial improvement requirement as requiring a written plan over the 31 month period.^{xxxii} However, it is not clear that the written plan is required or even satisfies the substantial improvement requirement, so additional clarity is needed.

How does real estate fit into all this?

Investors looking to develop real estate in opportunity zones were likely the primary target of this new program. New businesses, jobs, and growth in these communities seem to start with real estate. However, a plain reading of the new law begged the questions: 1) Does land even qualify? and; 2) If I’m not tearing the building down and rebuilding, can I really meet the substantial improvement requirement?

These points were so important and unclear that they could not be addressed in the proposed regulations alone. The IRS issued a Revenue Ruling (Rev. Rul. 2018-29) to clarify its position on the issue.^{xxxiii}

Based on the IRS Revenue Ruling, we can provide the opinion that the short answers are: 1) land qualifies for a QOF, and; 2) only the value of the improvements at purchase are subject to the substantial improvement requirement.^{xxxiv}

This means that a taxpayer could potentially purchase a property and allocate the purchase price between the land and improvements. For example, a \$1MM investment might be allocated 50% (\$500,000) to the land and 50% (\$500,000) for the improvements. The taxpayer must substantially improve the improvements by investing an additional \$500,001 over the next 30 months, but is not required to invest another \$1MM as additional capital.

In addition to this clarification, the Treasury is asking for comment on whether property already in a QOZ may at some point be deemed “not in use,” so a taxpayer could avoid the substantial improvement requirement altogether. For instance, imagine a run-down apartment complex that has been vacant for years. Its value may be high relative to what it needs in improvements to get it up and running. If it’s not being used now, shouldn’t any improvement and use count? We’ll keep an eye on this issue.

Leveraging the QOF Investment

Loans play a major role in any investment opportunity and QOZ investors sought clarity on how loans will impact the QOZ investment. The proposed regulations address loans in two different ways:

1. **Collateralizing a QOF Interest:** Investors may use their QOF interest as a collateral for a loan without disqualification.^{xxxv}
2. **Borrowing by the QOF or QOZ business:**^{xxxvi} Investors may borrow to acquire a QOZ business or QOZ business property in the QOF and the amount borrowed is not treated as a separate non-qualifying investment. This is a major win for investors because they can use leverage to acquire a more favorable and valuable investment, thus ultimately increasing the non-taxable appreciation potential for QOF investors. For instance, a QOZ business with \$1MM of qualifying gain investment could use that as 20% down on a \$5MM investment for QOZ business property or a QOZ business.

Wealth Planning Update

Re-Investing a Previously Deferred Gain

The regulations confirmed that a taxpayer can sell a QOF investment and re-invest within 180 days without recognizing the gain.^[i] This allows an investor to exit one QOF and invest in another.

Also, if you do not reinvest the full QOF amount, then the portion of the proceeds withdrawn are taxable. This is an area where the proposed regulations get very detailed and examples are provided to help determine how much gain and what type of gain should be recognized.^[ii]

Don't forget State Taxes

Lastly, let's not forget state taxes. This is a federal program and not all states conform to federal tax law. Though this could be a great opportunity to defer federal taxes, you may have to pay your state income taxes in the meantime. Be sure to check with your tax advisor to understand whether your state conforms to this new program.

Qualified Opportunity Zones – questions remain for taxpayers

With significant capital gains, exploring the advantages and disadvantages of an Opportunity Zone investment may be worthwhile. On the other hand, taxpayers should know that – since the regulatory guidelines are not final – some important questions regarding opportunity zones still remain unclear. A few of the considerations include:

- What measures will be put in place for operating Qualified Opportunity Zone Funds to insure that they continue to qualify while providing investment opportunities to unrelated parties with significant capital gains?
- What will the impact of the Opportunity Zone Fund legislation be? Who will benefit?

We are committed to keeping you up to date on Opportunity Zones and future clarity on these investments.

Disclosures

Wells Fargo Wealth Management, Wells Fargo Private Bank and Abbot Downing, a Wells Fargo business, provide products and services through Wells Fargo Bank, N.A. and its various affiliates and subsidiaries. Wells Fargo Bank, N.A. is a bank affiliate of Wells Fargo & Company.

Brokerage services are offered through Wells Fargo Advisors. Wells Fargo Advisors is a trade name used by Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC, Members SIPC, separate registered broker-dealers and non-bank affiliates of Wells Fargo & Company.

Wells Fargo affiliates may be paid a referral fee in relation to clients referred to Wells Fargo Bank, N.A.

Wells Fargo Bank, N.A. (the "Bank") offers various advisory and fiduciary products and services.
